Rutgers MS Marketing Analytics student, turning data into decisions while building real, working tools in AI and automation

EDUCATION

Rutgers University — **Jan 2026 - Dec 2026**
M.S. Marketing Analytics and Insights | GPA: 3.73 — *Newark, NJ*

Christ University — **Aug 2021 - May 2024**
Bachelor of Business Administration | GPA: 3.34 — *Bangalore, India*

EXPERIENCE

Performance Data Associate (Co-op) — **Sept 2026 - Present**
SharkNinja — *Needham, MA*

- Owned the end-to-end build of a mobile version of APEX, SharkNinja's company-wide hourly Amazon performance tracker, with a Microsoft Teams integration that pushes live updates to eCommerce sales teams
- Built a Best Seller Rank dashboard in APEX on Snowflake that tracks hourly per-SKU rank across SharkNinja's Amazon catalog, so teams catch slipping SKUs early and shift campaign spend during peak events like Prime Day
- Built a New Product Development tracker in APEX that automates 16 of 25 manually pulled launch metrics across NPD and 90-day Born to Run test SKUs, cutting weekly meeting prep from a week-long process to the same morning
- Led discovery meetings with sales teams across the U.S. and Canada to surface APEX pain points, turning their feedback into a prioritized feature backlog

Ad Sales Manager, Brand Partnerships — **May 2024 – Jul 2025**
MyGate | India's largest gated-community app, visitor management, payments, and an in-app ad platform reaching urban households across major India Cities — *Bangalore, India*

- Led the transformation of a two-year dormant account into a $120K city-wide advertising partnership with Malabar Gold & Diamonds by rebuilding audience targeting and redefining placement strategy across MyGate's platform
- Tripled Manipal Hospitals' average monthly in-app clinic bookings (75 → 230) in five months by introducing a variety of campaign offerings and A/B testing creatives against targeted audience segments
- Scoped and tracked campaign KPIs for Manipal's in-app integration, translating business goals into measurable outcomes and feeding results back into the product team's roadmap decisions
- Onboarded and mentored two junior sales associates over six months, leading onboarding and cross-functional coordination to accelerate their path to revenue contribution

PROJECTS

Rosco AI | *Personal AI assistant, built to live inside my iMessage instead of another app* — **April 2026**

- Built and shipped a working AI agent using the Claude Agent SDK, integrating four external services, Sendblue, Composio, Convex and Ngrok into a unified low-code pipeline
- Automated email triage, calendar tracking, and internship monitoring end-to-end through natural language, for personal daily use

F1X Drive to Survive | *Quantifying how a Netflix docuseries reshaped the U.S. Formula 1 fanbase* — **May 2026**

- Led group analysis using OLS regression and Pearson correlation, cross-referenced from 8 datasets, to isolate Netflix's impact on U.S. Formula 1 viewership
- Applied VADER sentiment analysis to surface divergence between traditional and new fans; identified female fan share tripling as the strongest demographic shift correlated with the show's release

Amazon Category Intelligence | *Built agent-ready marketplace data, documenting exactly where the agent breaks* — **August 2026**

- Built an end-to-end pipeline using the SerpAPI Amazon Search API to pull and normalize 160 listings across 5 search terms, resolving brand and category from unlabeled raw data
- Built a natural-language query agent on the dataset using the Claude Agent SDK; found **white-label sellers hold 31%** of category shelf share
- Tested the agent with answerable, unanswerable, and false-premise questions, documenting 7 failure modes, including 2 errors in my own analysis it surfaced, and fixed a ranking bug that had inflated the headline finding

SKILLS

Analytics & Visualization: SQL (Snowflake, MySQL, SQL Server), Tableau, Power BI, Excel, Google Sheets, Google Analytics
Product & AI Building: Prototyping, Low-Code/No-Code Automation, AI Agent Development, A/B Testing,
Marketing & Strategy: Market Research, Email Marketing, Generative AI, Google Ads
AI & Automation Tools: Claude SDK, Claude Code, Claude Cowork, Snowflake Cortex Agent ChatGPT, Cursor, Convex, Sendblue
Tools & CRM: Git, Github, VS Code, Salesforce, HubSpot, Microsoft Office, Notion, Canva, Miro, AWS, Google Suite
